

What are Release Notes ??

A release note is a technical documentation prepared by QA and shared with customers when a new software product launches update (e.g., recent changes, feature enhancements, or bug fixes).

Why is it required ?

- To notify all the customers about the new feature/ bug fixes/Enhancements / update etc.

What and all will be there in Release Notes??

- Copyright information
 - Revision history
 - Table of contents
 - Release highlights
 - Build details
 - Deployment notes
- Important URL and Instruction
 - Out of scope/ Open Bugs

Release Notes
